PRICING GUIDE

Smile Now Denver

Welcome and congratulations! Smile Now Dentures and Implants is so excited to welcome you to the world of implant dentistry. Through implants, **the greatest dental technology of the 21st century, the effects of tooth loss are a relic of the past.** Gone are the days of embarrassment due to missing or unsightly teeth that steal your livelihood and diminish your quality of life.

This brochure is **our contribution to helping patients understand everything you need to consider as you research dental implants** and what they can do for you! At Smile Now Dentures and Implants we know that dental implants are a **big decision**, often with **large financial considerations**. Our hope is that in helping you understand dental implants **exactly how a Dental Implantologist understands them**, you can make the best decision for a long-lasting, healthy smile that radiates happiness.

No matter your situation, whether you know a lot about implants or are just beginning to explore the benefits of a brighter smile, take comfort in knowing **you are not alone.**

As you investigate dental implants, whether for yourself or someone very important to you, you will find the **best answers to the most difficult questions** about implants and **who is most qualified** to help you with these treatments. You may not even know some of the questions that are the most important! With having placed and restored thousands of implants, I'm sharing with you what I would consider **the most valuable information** as you embark on your dental implant journey. These questions are all addressed in this manual.

As you read, take notes and be prepared! **Your new, improved smile is ready as soon as you are!**

Dr. Soren Paape, DDS FICOI

TESTIMONIALS

After two tries at other facilities that did not work out, feeling frustrated and defeated I decided to try Smile Now! They made me feel comfortable from the start and were able to answer all my questions and finally able to help me eat and smile again! ! Thank you!

-Carol F.

We felt very comfortable during our whole visit. The length of time spent with us was outstanding and we felt very informed of all options for my husband. We previously visited w/ another dental professional whose prices were outrageous. We would definitely recommend Smile Now Dentures and Implants for all your denture and implant needs.

-Tom H.

I have never had a better experience at a dental office! It was very informative and straight up on everything that they were going to do. They made me feel at home. I would highly recommend Smile Now Dentures and Implants to anybody who needs implants.

-Jerry M.

to "Smile Now"!

There are many reasons people experience tooth loss: decay, gum disease, health issues, genetics, accidents, violence and old age to name a few. Most often, these issues are not the fault of those who suffer! **Whatever the reason, you do not have to experience the consequences of tooth loss for the rest of your life!**

Irregardless of how you found yourself without teeth, the solution that will give you the **greatest quality-of-life** includes solutions to the following questions:

QUESTIONS?

Natural Appearance- Will my new teeth feel and look real? Will they allow me to eat and speak properly?

Health- Will my new teeth stay healthy? Will they damage other teeth or wear down in time? Can they decay like normal teeth?

Longevity- Will my new teeth last a long time? What is their life expectancy compared to dentures, root canals or large fillings? How will I feel if I have to pay to redo the work again in the future?

Comfort- How comfortable will my new teeth be? Will they cover my palate? Will they be bulky in my mouth? Do I have to remove them?

Maintenance- Will my teeth be easy to clean? Do I have to replace parts and how often? What will replacement of parts cost?

WHETHER YOU ARE REPLACING ONE TOOTH OR MULTIPLE, DENTAL IMPLANTS ARE THE BEST SOLUTION TO ALL THESE QUESTIONS!!!

Full-Arch treatments refer to the replacement of most or **all teeth on a single arch**. While these treatments should be **considered one of many options**, most of the advantages are of **great benefit to the patient**. These benefits include:

Ideal Tooth Appearance- the transition from decayed and hopeless teeth or dentures to fixed full-arch results in ideal smiles. The additional improvements of **digital dentistry make quick, beautiful smiles a reality**.

Reduced Expense- some teeth are so deteriorated that treatment to save them results in excessive expense that isn't possible for everyday incomes. While some dentists continue to charge excessive amounts for full-arch treatment, cost is coming down as technology reduces expenses and improves outcomes. **Some dentists, like Smile Now Dentures and Implants, pass these savings on to their patients.**

Reduced Treatment Time- Before advanced implant techniques like remote anchorage, palatal approach, angled implants and easy to use prosthetic parts, implant treatments often relied on grafting which required 6-12 months until teeth were attached. **Today, same-day teeth are a reality for patients interested in a single surgery and same-day results.**

Longevity- in some ways implants are better than other treatment options. Unlike teeth, implants can't decay, rot and rarely fracture. **Long-term survival rates show over a 90% success rate, even after 20 years of use.*** These studies demonstrate a great benefit to implants over alternative treatments.

HOW MANY IMPLANTS ARE REQUIRED FOR FULL-ARCH TREATMENT?

The original All-on-Four treatment used, you guessed it, four implants to replace all teeth in a single arch. **Today, over twenty years later, four implants can still be used, but when possible, more is better.** For some patients, **More Than Four will be necessary** for the longevity they expect.

“THE MAIN ADVANTAGE
OF **MORE THAN FOUR** IS
LONGEVITY”

HOW DO YOU DETERMINE IF MORE THAN FOUR IS POSSIBLE?

The biggest determinant of receiving more than four implants during surgery depends on the skillset of your surgeon. **Whether your surgeon is a general dentist or a dental specialist like a periodontist or oral-surgeon, their ability to place implants is directly related to training!** I would rather receive treatment from a general dentist with extensive training and experience with remote anchorage than a specialist that lacks that specific training and experience. **Receiving more than four implants instead of just four will often depend on that one thing.**

I don't have enough bone.

It is normal to wonder if you have enough bone to qualify for implants. With advanced training, even **those with little to no bone can receive treatment** resulting in a new, immediate smile!

1

2 I'm too old.

Age is just a number. Many of our patients are in their middle to late 80s. As long as you're healthy enough and have a desire to smile, you're not too old!

I can't afford it.

Some financing companies are specific to medical and are willing to help. Smile Now Dentures and Implants has many options to help patients receive the treatment they need, this include in-house financing.

3

4 I'm too afraid.

With sedation, no one has to be afraid. At Smile Now Dentures and Implants **deep sedation is included in the treatment cost**. We have helped thousands of people smile again. We can help you too!

It takes too long.

With today's technology, smiling occurs immediately. Our typical case can have both the upper and lower jaw surgery completed with more than four implants and receive their teeth, all in the same-day.

5

IMPLANT COST

The cost of full-mouth dental implants can vary widely depending on factors such as geographical location, the specific clinic or dentist, the materials used, and additional treatments required. **Over the past decade, the cost has generally trended downwards due to advancements in technology and improved materials.** It's essential to note that while the overall trend may be a decrease in cost, there are still clinics that are slow to pass savings on to patients and continue to charge higher fees.

The national average cost-per-arch typically ranges from \$25,000 to \$35,000 in the United States. This cost should include the surgical procedure with anesthesia, extractions, bone-grafts as necessary, implant placement, same-day healing teeth, prototypes of the final teeth, customized final teeth made from a long-term, stable material and follow-up appointments. Keep in mind that this is a rough estimate, and actual costs can differ based on the factors mentioned earlier. **It is wise to be cautious about extremely low-cost dental implant offers. These offers often lack the proper expertise, materials and ongoing maintenance for long-term success.**

It's crucial to consult with a qualified dental professional for an accurate assessment of your specific needs and to obtain a personalized cost estimate based on your unique situation and preferences.

Intervals

Doctor-Patient Interactions

Did the doctor spend adequate time with you and answer all of your questions? Do you have access to them for emergencies or after clinic hour concerns?

Initial Consultation

Was the initial consultation comfortable? Did you have to pay to see the doctor and did they spend time with you to assess your situation? Did they discuss your health history and goals?

Technology and Equipment

Does the office have the best technology? Is it a clean office that looks well taken care of? Are they able to provide you a same day solution without additional time and multiple surgeries?

Transparency

Did the doctor show you your x-rays? Did they inform you of all your options and discuss the benefits as well as the risks involved? Are they upfront about costs or hidden fees?

Frequency of Treatment

Does the doctor preform these procedures regularly? How often do they do them and what do their reviews say about previous patient experiences?

Timeline

Was the office clear about the treatment timeline? Do they offer informational handouts to help you understand the process and what to expect?

REQUEST YOUR FREE CONSULTATION PACKAGE TODAY!

 **FREE Dental Exam-** Our goal is to help you overcome the debilitating effects of losing your teeth. We provide a **friendly, judgement-free environment** to review your situation and offer specific recommendations based on your needs.

 **FREE 3D X-Rays and Smile Design-** Dr. Stott personally meets with you to review your x-rays and provide recommendations based on your specific situation. **Bring your spouse or any significant other** that can help you with these important decisions.

 **FREE Treatment Plan & Quote-** Sit down with our friendly staff to discuss treatment options and associated costs. You will receive additional information and be able to explore financing options, **in-house and through medical specific financing options.**

★★★★★ 4 months ago

The visit to this dental clinic was very pleasant and satisfactory. They welcome the patient in a very cordial and friendly manner. I spoke with Dr. Soren Paape and he explained everything in detail about the treatment required, he was very specific and professional in his response about the treatment process, he answered all my questions. with excellent technology in its equipment.....an excellent place. I hope to start my treatment, have the expected results and then be able to give new reviews and of course good recommendations.

1/30/2024

Very grateful and satisfied with the process of my dental implants. Thank God everything has healed quite well, in my routine visit yesterday I was treated very well by Dr. Soren Paape who clarified my questions and doubts, as well as by his assistants who are specialists in these treatments. They treated me very well, very kindly and with a lot of patience with me. Also very grateful to the reception staff, who very kindly attend to all the patient's concerns. waiting for the final result soon. I still have time left!! It is an excellent clinic with advanced technological medical equipment. He is truly an excellent doctor, with his appropriate team of personnel who provides and ensures quality care to his patients. I recommend it for your treatments.

★★★★★ 2 weeks ago **NEW**

I was taken with how warm and inviting it was, then I met Dr Paape and talk about making it all about the patient! I didn't say much but he hung on every word and before I knew it I had been taken care of. Fair price for top shelf service! If you choose to give them a try, you will find yourself beyond satisfied!

★★★★★ a day ago **NEW**

I had the opportunity to go to Doctor Soren Paape's dental office for an implant in my teeth, and I have to say that from the first consultation my nerves disappeared. He and all of his assistants treated me professionally and cordially, to the point of feeling completely relaxed and with no doubt that I had made the best decision for me. The office manager, Nelly, was always in contact with me, informing me of the appointments and progress of each step of the implant process. I sincerely recommend the office of Doctor Soren Paape and his professional team, in everything that his specialty of dental implants is concerned. I now feel more confident and I repeat that I recommend him one hundred percent, as I have already done with my relatives. Thank you Doctor Paape, thank you very much for all the services received.

★★★★★ a month ago

Alyssa did most of my work yesterday. She was great. Working as fast as she could, but, it was a very long appointment (longer for her than for me) as there was a lot to do in preparation for my next transitional teeth. She was professional, thorough, and made sure everything was done correctly before releasing me. A great office and office environment. The entire office staff is amazing, working together as needed, yet having their own area of expertise. I appreciate everyone so much!

Great team of professionals to work with. The best office in Denver and we looked at many of them. Ten weeks out from surgery and received my stage two dentures last week. They are beautiful and fit and feel great. Dr. Paape and his entire staff continue to impress. Their knowledge and execution are flawless. Their passion is to provide a great product and patient care.

Pre-Op

Same Day Teeth

Finals

Patient is a 69 yo Male. Unremarkable health hx. Pt has been in **dentures for 20+ years** and **told by many providers that he has insufficient bone for implant placement** due to thin ridge. Gold implants placed with palatal approach due to thin ridge. All torqued beyond requisite 35ncm. As patient had a **narrow anterior maxilla remote anchorage implants were placed as indicated by Pink implants**. This allows for maximum tooth support for both same-day teeth and final zirconia teeth. Lower jaw was done as **traditional All-on-Four** due to insufficient clearance over the Inferior Alveolar Nerve. **Total implants placed: 10.**

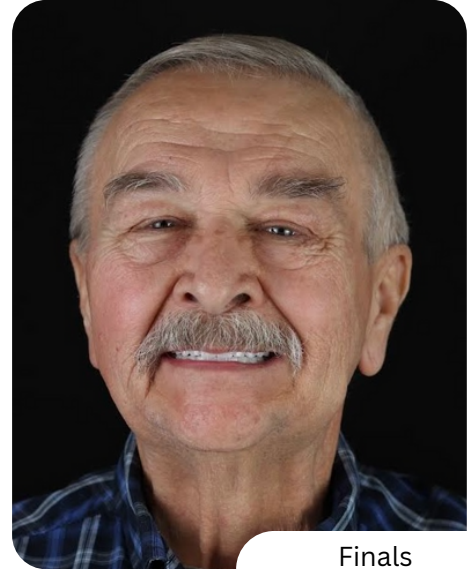

CASE-STUDY

Pre-Op

Same Day Teeth

Finals

3D X-ray of Implants

Final **Zirconia** teeth delivered at **3-4 months**. Healing was uneventful with no implant failures. Patient comes back for 6 month recalls. Total cost to patient with sedation and **10 implants**, under **\$40,000**.

Final Zirconia Teeth
